EDUCATION

Ohio State University **Columbus, Ohio**
Bachelor of Arts in Computer Information Science **May 2025**

WORK EXPERIENCE

Safelite **Cleveland, Ohio**
Software Engineer **July 2025 - Present**

- Built Claims IQX from the ground up, Safelite's first real-time, end-to-end claim tracking platform for the commercial glass workflow, from claim creation through technician fulfillment.
- Developed frontend features in Vue.js with Vitest for unit testing, and backend services in C# (.NET) and Python, processing high-volume claims for State Farm, Liberty Mutual, Amazon, and third-party glass networks.
- Owned Nx monorepo architecture, establishing scalable library boundaries, shared component patterns, and CI/CD integration that enabled multiple product teams to ship features independently.
- Designed AWS infrastructure components including S3 storage integrations and YAML-driven deployment pipelines, improving system reliability and delivery speed.

American Municipal Power (AMP) **Columbus, Ohio**
Computer Science Intern **Jun 2023 - June 2024**

- Built internal automation tools using Oracle and JavaScript to streamline operational monitoring and reduce manual workflow overhead.
- Provided front-line support by monitoring and resolving technical service tickets; collaborated with senior engineers to troubleshoot and escalate complex infrastructure issues.

PROJECT EXPERIENCE

Insight to Student Productivity **Columbus, Ohio**
ASA Datafest 2024, Ohio State University **Mar 2024**

- Top-10 finalist at ASA DataFest 2024 for building a data-driven prototype website using Tableau, HTML, CSS, and JavaScript.
- Analyzed CourseKata learning data and designed visualizations that improved student engagement and study efficiency across 12 eBook chapters.

RateMyClass **Columbus, Ohio**
Web Developer **Mar 2024 - Apr 2024**

- Built a web application that aggregates course and instructor ratings to help students make informed scheduling decisions.
- Implemented backend services using Ruby on Rails (MVC architecture) and automated data collection with Selenium and Mechanize.
- Designed responsive UI using Bootstrap and React, and implemented Devise authentication for secure user accounts.

Pawn Shop Simulator Game **Columbus, Ohio**
Personal Project **July 2024 - October 2024**

- Built a prototype 3D pawn shop simulation game focused on item evaluation, negotiation, and probabilistic decision-making.
- Implemented gameplay logic allowing players to assess item authenticity and manage risk when buying and reselling goods.
- Designed and created original pixel-art assets (characters, items, environments) using Photoshop and integrated them into the game.

SKILLS

Languages: C#, Python, JavaScript, Java, C/C++, HTML/CSS, SQL, Vue.js, .NET, React, Tailwind CSS
Tools: AWS (S3), Git, Nx, PostgreSQL, Oracle, Unity, Playwright, Vitest
